Voron PUG printables reference

Workshop copy | Source and fit notes | November 10, 2026

01 Parametric Umbilical Gland

fbeauKmi's PUG family is listed as GPLv3 in Printables remix attribution. The local V4 gland files are L, M and S SOP variants with 10.0 mm in their filenames. The exact downloadable revisions and original print settings remain unverified.

03 Trident A-drive maker instructions

For the linked Trident design, use two M3 x 18 socket head screws and one M3 5 x 4 heat-set insert. Install the insert in P1. Place the PUG and cable in the holder, close and secure the holder, then attach the plate to the A-drive. Printables lists this design as GPLv3.

Local inventory: Printer/rewiring/README.md. Direct access to several model pages was blocked, so this sheet summarizes the accessible descriptions and links.
